

What is Claimed is:

1. A bathing tool for securing a cleaning object by a fixing object, comprising:

a cleaning object;

5 a fixing object, coupled to said cleaning object; and

upper and lower contacting members, for wrapping said cleaning object;

wherein, said fixing object encompasses the exterior of said cleaning object. The upper and lower contacting members mutually engage and compress said cleaning object to define an accommodating space disposed at the compressed position for securing a fixing object therein.

2. The bathing tool for securing a cleaning object by a fixing object of claim 1, wherein said cleaning object is an elastically compressible sponge.

3. The bathing tool for securing a cleaning object by a fixing object of claim 1, wherein said fixing object is a rope.

4. The bathing tool for securing a cleaning object by a fixing object of claim 1, wherein said upper and lower contacting members are made of washed unwoven cloth.
